Virginia Agricultural Experiment Station is sponsoring a grant writing workshop for eligible faculty in CALS, VMCMV, and CNRE who want to learn to write successful proposals for USDA and NIH.

Grant Writers’ Seminars & Workshops was founded by academic researchers, to provide other academic investigators with formal training in how to write competitive grant proposals.

Emphasis will be placed on doing the “extra” things that can make the difference between being funded versus not. Participants will be taught to write with a linear progression of logic using a specific approach which leads reviewers through an application.

This course will highlight the fact that applicants are writing for two different audiences - the assigned reviewers, who read the application in its entirety, and non-assigned reviewers who may read little, or none, of the proposal before the meeting of the review panel.

The course will be taught by Lauren Broyles who teaches faculty to successfully write proposals for all the major federal agencies.

**WHEN:**

September 20, 2022
8:30am-4:30pm
Write Winning Grant Proposals, Core Content, with special attention to USDA/NIFA

September 21, 2022
8:30am-12:00pm
Write Winning Grant Proposals, NIH Supplemental Session

**WHERE:** Skelton Conference Center, Assembly Hall Auditorium

**REGISTER HERE**

BY AUGUST 29, 2022

- The September 20 seminar is a prerequisite to attending the NIH-focused seminar on September 21, 2022. You must register/attend Day 1 in order to attend Day 2.
- All participants receive an extensive pdf handout, as well as a copy of The Grant Application Writer’s Workbook. The workbook is designed to facilitate application of what is learned in the seminar using a step-by-step approach.
